Update on

RTIR Working Group

Carlos Fuentes Bermejo <carlos.fuentes@rediris.es>

- Project status

- Miscellanous

- Contract was signed between TERENA and BestPractical on 6th September

- Started on 6th October

- First milestone will delivery on 6th April (less than two months)

- Status: 51% of the requirements are done

  - Not realistic at all because they completed the hardest first

- Let me show you what the new RTIR looks like

- RTIR-WG meeting (closed for participating in RTIR project only)

  - This evening at 7.30 (nobody will be able to get out unless all the items are done)

  - First goal gets ready for the 1st milestone

    - Be aware that we need to allocate time
    - Be aware that we need a testing enviroment

  - Get over the Test and Procedure Document

    - Define the basic testing, the enviroment, how to evaluate ...

  - Discuss the proposal of Milestone Document for the first milestone

- Talk at the 5th Abuse Forum Workshop

- Wiki for the working group

- VmWare Image for testing RTIR

  - Fedora Core 4

  - RT 3.0

  - RTIR 1.0

  - All necessary perl packages are included (RPMs)

  - Why?

    - A number of people said: "RTIR is difficult to install" (a guy from the street)

  - The image will be located in RedIRIS' ftp (will be avalaible for replicating)
